NOW YOU SEE IT, NOW YOU DONT....

...that ugly, hazy film on the surface of the headlights: Remove it with our Professional Headlight Restoration Kit. Use on: Headlights, tail lights, windshields, plastic camper windows, eisenglass, plastic windows, convertible car windows, helmet face shields, boat hatches, light bars, bug deflectors ... Just apply Flitz Polish & Buff off. Improves safety*. Makes money.

*IMPORTANT SAFETY INFORMATION:

According to the Federal Motor Carrier Safety Administration (FMCSA), the Federal Motor Carrier Safety Regulations (FMCSRs) and the National Highway Traffic Safety Administration's Federal Motor Vehicle Safety Standards: Section 392.33 Obscured Lamps or Reflector reads "Operating a Commercial Motor Vehicle with lamps/reflectors obscured carries a Violation Severity Weight of 6; this is on a scale of 1 to 10. In comparison, a fifth wheel's defective locking mechanism carries a severity weight of only 3. So, it is more important and safer to keep your headlamps clear than to keep the brakes on the fifth wheel in good operational condition according to this scale.

These violations are recorded at the Federal Motor Carrier Safety Administration and a poor rating will take a carrier or driver from "Continue to Operate" to "Unfit". These violations stay on your record for 2 years and if found "unfit" the carrier or driver may not be able to continue to operate until the violations are cleared.
