PDK25503

FLITZ USES

HOUSEHOLD

Nickel & Chrome Faucets, Glass Shower Doors, Granite, Marble & Sterling Silver, Brass Hardware, Copper Pots & Pans, Glass & Stainless Stove Tops, Stainless Steel Kitchen Appliances, Painted Appliances, Aluminum Gutters, Fiberglass Tubs & Showers, Corian, Tile, Formica, Silver Plate, Bronze & Silver Flatware, Black Streaks.

MARINE

Chrome, Fiberglass Hulls, Eisenglass, Plexiglass Windows & Hatches, Stainless Steel & Bronze Hardware, Glass, Anodized Aluminum, Stainless or Aluminum Bow Rails.

SPORTING GOODS

Snowmobiles, Gold Clubs, Knives, Fishing Tackle, Factory Blued Guns, Brass & Silver Lures, Nickel, Stainless Steel, Tumbling, Tactical Matte Finishes.

AVIATION

Chrome, Fiberglass Hulls, Eisenglass, Plexiglass Windows & Hatches, Stainless Steel & Bronze Hardware, Glass, Anodized Aluminum, Stainless or Aluminum Bow Rails.

AUTO, CYCLE, TRUCK & RV

Valve Covers & Motor Castings, Aluminum & Chrome Wheels, Painted & Plexiglass Surfaces, Chrome Exhaust Pipes, Headlights, Diamond Plate.

FARMING

Painted Tractors, Aluminum Livestock & Horse Trailers, Painted Tractor Wheels, Headlights, Exhaust Pipes.

FLITZ

WHEELS

Use Flitz Paste or Flitz Liquid Polish:

- Apply a small amount of Flitz Polish to wheel, chrome, aluminum, magnesium, or painted wheels.
- Spread with buffer at low speed.
- Finish with a high speed (at least 2500 RPM).
- Wipe off any residue with Microfiber Polishing Cloth.

HEAVILY OXIDIZED ALUMINUM

First, spray the area with Flitz Metal Pre-Clean, scrub and rinse with water.
Then polish the area using Flitz Polish Paste and and Flitz Microfiber Cloth.

CLEAR COATING ON METAL

Flitz Polish will not harm or remove clear protective coatings. How to tell if there is a clear coat on your metal?

- Apply a small drop of Flitz polish, using a paper towel, apply pressure and briskly rub. If the paper towel DOESN'T turn black, then the metal has a clear coat.

You will need to remove the clear coat before polishing the underlying metal.

HEADLIGHTS

Apply Flitz Polish directly onto outside of headlight lens and run Flitz BuffBall (at slow speed) to spread the polish. Increase speed, applying pressure, and buff until clear.

For EXTREME faded headlights:

- Use 1500-2000 grit sandpaper and wet sand the lens for a smooth surface.
- Buff with Flitz Polish and BuffBall to finish.
- Seal with Flitz Ceramic Sealant to give you safe driving for years to come!

EISENGLASS

Scuff marks and discoloration:

- Apply Flitz Polish with a damp microfiber cloth. Buff with a clean and dry Flitz Microfiber Cloth or BuffBall.

HUNTING & RIFLE CLEANING

Always take extreme care to be sure your gun is not loaded before cleaning. Apply Flitz Polish or Flitz Bore Cleaner to a clean gun patch or bore brush. Lightly scrub inside the barrel. This will remove lead or copper fouling. Then buff the bore with a clean gun patch. Flitz Polish safely removes rust on factory gun bluing.

LARGE ALUMINUM AREAS

Semi-Truck; Aircraft; Pontoon Boats

- Apply a thin coat of Flitz Paste to surface to be buffed.
- Use a Flitz BuffBall, orbital buffer, lamb's wool, or foam pad to buff.
- Wipe off any residue with Microfiber Polishing Cloth.

DIAMOND PLATE ALUMINUM

Use Flitz Polish with BuffBall to reach ALL grooves and crevices. Start with low speed to spread the Polish Paste then finish with high speed.
For LONG TERM protection, treat the area with Flitz Cermaic Sealant!

REMOVE RUST ON METAL

Use Flitz Polish with #0000 steel wool to act as an abrasive. Marine Application:
ONLY use Bronze wool with Flitz Polish. Bronze wool will not rust.

HEAVY TARNISH AND ANTIQUES

Brass, Copper, Bronze ONLY:

- Use Flitz Instant Brass/Copper Tarnish Remover to clean the surface. Wearing gloves, spray on and let sit up to one minute and rinse with water. Repeat if necessary.
- Polish with Flitz Polish and Microfiber Cloth!

This product is free from acid; its made with organic salt.

CALCIUM, LIME, HARD WATER STAINS

Spray Flitz Instant Calcium, Rust, Lime Remover and scrub the affected area. DON'T LET DRY!
Rinse with clean water after two minutes. Repeat if necessary.

FIBERGLASS, PLEXIGLASS & PAINT

Flitz will safely remove oxidation, sun fading and scuff marks. For a SMALL area, apply Flitz Polish with a damp microfiber cloth. For a LARGE area, apply a thin coat of Flitz Polish and spread with Flitz BuffBall at low speed. Finish buffing at high speed (2500rpm) for best results. For longest shine & protection, use Flitz Ceramic Sealant. Spray Sealant onto polished surface and buff with a clean and dry Flitz Microfiber Cloth

BuffBall

CARE & USE GUIDE

INSTRUCTIONS FOR USE:

- Properly secure the Flitz BuffBall onto drill or air tool. (Use only in forward or clockwise rotations.)
- Apply thin coat of Flitz Polish onto surface.
- Buff lightly, at a slow speed, and allow polish to break down.
- Increase speed and buff at high speed (up to 2500 rpm).
- Repeat this process until desired effect is achieved!

WASHING INSTRUCTIONS: (Pre-Soak Recommended)

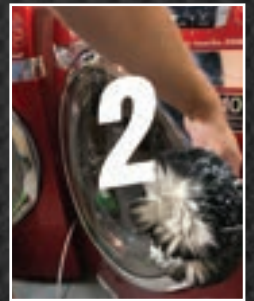

HAND WASH = 2" & 3" BuffBalls

- Soak in a bucket for 1 hour with dish soap and Oxiclean.
- Rinse out with hose or in a shop sink.
- AIR DRY ONLY!
(Machine dry will void warranty)

MACHINE WASH = 5" & 7" BuffBalls

- Use regular laundry detergent. (Add Oxiclean for best results.)
- Do not use fabric softeners.
- AIR DRY ONLY!
(Machine dry will void warranty)

WARRANTY:

1 Year warranty against premature failure.
Warranty void when using polishing compounds other than Flitz Polish.
