Flat/Matte paint finishes contain microscopic imperfections that refract light. This decreases the amount of shine that the flat/matte finish gives off. Waxes and fillers would fill these imperfections which would cause the flat/matte finish to be uneven and splotchy. **Our Flitz Flat/Matte Finish Cleaner does not contain any waxes or fillers. IN FACT . . . our product will remove the residue left behind from waxes and fillers bringing back the pristine flat/matte finish you love!**
